RESTRICTION

1. Applicant's amendment filed on 7/20/01 has been entered. Claims 1-18 have been canceled. Claims 19-42 have been entered, Claims 19-42 are pending in the application.
2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 19, 21, 24, 26, 27, 30, 35, 36, 38, and 42 drawn to SEQ.ID.NO: 2, polypeptide fusion protein, vaccine and a method of inducing immune response to Neisseria.

Group II, claims 20, 22, 23, 25, 28, 29, 31, and 32-34 drawn to SEQ.ID.NO: 1 DNA, vector and host cell and process of expressing polynucleotide.

Group III, claims 37 and 41 drawn to antibodies that bind to SEQ.ID.NO: 2 and a therapeutic composition comprising said antibody.

Group IV, claim 39 drawn to a method for diagnosing Neisseria infection using peptide or antibody.

Group V, claim 40 drawn to a method for inducing immune response using polynucleotide, SEQ.ID.NO: 1.

3. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I is directed to a polypeptide and a method of use. The special technical feature is the polypeptide, which is made up of amino acids. Groups II-III are drawn to structurally different products namely nucleic acids and antibodies which do not require each other for their practice

Art Unit: 1645

and do not share the same or a corresponding technical feature because polypeptides, nucleic acids and antibodies do not contain a common structure, common property and common function. Group I is drawn to a polypeptide and a method using said polypeptide is the first product and product of use. The Groups IV-V inventions are drawn to ^{methods} using nucleic acids and antibodies that contain no common structure, common property and common function and do not require each other for their practice and do not share the same or a corresponding technical feature. Note that PCT Rule 13.2 does not provide for multiple products or methods within a single application. Since the special technical feature of the Group I invention (polypeptide) is not present in the Group II-III claims, unity of invention is lacking.

4. Applicant is required, in reply to this action, to elect a group to which the claims shall be restricted. The reply must also identify the claims readable on the elected invention, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Padmavathi v Baskar whose telephone number is (703) 308-8886. The examiner can normally be reached on M-F (6:30A.M-4: 00 P.M.) First Friday off.
